

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A mobile terminal, comprising:
a processor;
a transceiver; and
memory for storing computer readable instructions that, when executed by the processor, cause the mobile terminal to perform steps comprising:
 - (i) receiving a task;
 - (ii) providing two response options to a first player using the mobile terminal, comprising:
 - a. forwarding the task for delivery to a second mobile terminal; and
 - b. sending a response to the task to a task server;
 - (iii) receiving a player input selecting a one of the two response options; and
 - (iv) performing the selected response option.
2. (Original) The mobile terminal of claim 1, wherein the computer readable instructions further cause the mobile terminal to perform the step of, upon completion of step (iv), displaying an error message when the player attempts to perform another response option.
3. (Currently amended) The mobile terminal of claim 1, wherein in step (iii), when the first player selects said response option (a), said player input comprises an identity of a second player.
4. (Currently amended) The mobile terminal of claim 1, wherein in step (iii), when the first player selects said response option (b), said player input comprises response information.

5. (Currently amended) The mobile terminal of claim 4, wherein in step (i) the task comprises a question and, in step (iii) said response information comprises an answer to the question.

6. (Currently amended) The mobile terminal of claim 4, wherein in step (i) the task comprises a physical task and, in step (iii), said response information comprises data proving that the physical task was completed.

7. (Currently amended) The mobile terminal of claim 4, wherein in step (i) the task comprises at least one of audio and video data ~~audio and/or video data~~ and, in step (iii), said response information corresponds to the at least one of audio and video data ~~audio and/or video data~~.

8. (Currently amended) The mobile terminal of claim 4, wherein in step (iii), said response information comprises at least one of audio and video data ~~audio and/or video data~~ recorded by the mobile terminal.

9. (Original) The mobile terminal of claim 3, wherein in step (iii), the second player is one of a group of players that have not already received the task.

10. (Original) The mobile terminal of claim 3, wherein in step (iii), the second player is one of a group of players on a same team as the first player using the mobile terminal.

11. (Currently amended) The mobile terminal of claim 3, wherein in step (iii), the second player is one of a group of players registered with the ~~game~~ task server.

12. (Original) The mobile terminal of claim 1, wherein the computer readable instructions further comprise the step of only performing steps (ii)-(iv) within a predetermined amount of time of step (i).

13. (Original) The mobile terminal of claim 1, wherein the task comprises a game task.

14. (Original) A method for solving a task using a mobile terminal, comprising steps of:

- (i) the mobile terminal receiving the task from a game server; and
- (ii) the mobile terminal responding to the task by performing one of:
 - a. submitting a task response to the game server; or
 - b. forwarding the task to a different mobile terminal;

15. (Original) The method of claim 14, wherein step (ii) must be performed within a predetermined amount of time after step (i).

16. (Original) The method of claim 14, wherein in step (ii)(b) the different mobile terminal is one of a plurality of mobile terminals on a same team as the mobile terminal of step (i).

17. (Original) The method of claim 14, wherein in step (ii)(b) the different mobile terminal is one of a plurality of mobile terminals that has registered with the game server.

18. (Original) The method of claim 14, wherein in step (i) the task comprises a question and, in step (ii)(a), the task response comprises an answer to the question.

19. (Currently amended) The method of claim 14, wherein in step (i) the task comprises at least one of audio and video data ~~audio and/or video data~~ and, in step (ii)(a), the task response comprises information corresponding to the at least one of audio and video data ~~audio and/or video data~~.

20. (Currently amended) The method of claim 14, wherein step (ii)(a) comprises the mobile terminal recording at least one of audio and video data ~~audio and/or video data~~ corresponding to the task.

21. – 45. (Canceled)

46. (Currently amended) A mobile terminal, comprising:
a processor;
a transceiver;
a display screen;
an input device; and
memory for storing computer readable instructions that, when executed by the processor, cause the mobile terminal to perform the steps of:

- (i) receiving game task information from a game server;
- (ii) displaying a game task and two response options on the display screen, wherein the two response options comprise:
 - a. passing the game task to another player; and
 - b. responding to the game task;
- (iii) when receiving a user input via the input device indicating a user selects said response option (a), sending a forward request to the game server; and
- (iv) when receiving a user input via the input device indicating the user selects said response option (b), sending a message comprising a response to the game task to the game server.
